## What's New In?

Live camera of London with live view of Big Ben & walking tours. From early May 2012. London Highlights is a helper that provides you with a quick and friendly access to a live view of London, England, on your Windows machine. It is an open source project that can be downloaded for free and is being made available for the first time in the Digg Homepage. London Highlights does not come bundled with any extra configuration settings or other settings that could affect the way the application behaves or works. No advanced features or tweaks are hidden under the hood. It is light on system resources, so it does not affect your PC performance. London Highlights Live View Live view from the London Eye is presented on your desktop. You can conveniently make a tour of this stunning attraction while keeping your PC running in the background. Clean and simple design Installation is super easy. What's more, the interface remains very clean and simple. There are two major options in the application in order to show the view of London: tour and live camera. The former allows you to see the city from a pre-arranged tour. The latter provides you with a live view directly from Big Ben. Both options are available directly from the application tray and you may open a detailed view of the picked tour or still a live view of London. You can assign a name to the live view. This feature is available directly from the view. You may re-arrange the tours and change the name at any time. There is an integrated scheduler that allows you to browse through all tours and pick the most convenient one for you. There is also an integrated hint icon that informs you about the steps required to make the tour. Hints appear when you mouse over the icon. The hint display comes in handy when you are dealing with a tour that requires multiple steps. What's more, you can easily drag the London Highlights application to any screen corner using drag-and-drop. The application always keeps the same position on your screen and does not take into account the size of your main task bar. No tips are revealed about how London Highlights works. You are provided with all the information you need in order to get familiar with the application, learn how to configure it and start using it without any bother. Extra features London Highlights is an open source application and is being made available for the first time in the Digg Homepage. Web based configuration The application is quite versatile. You can open
