Apple Watch Series 1 vs Apple Watch Series 3 The Apple Watch Series 1 was the first true smartwatch from Apple, and it's survived iOS's near-constant improvements for almost three years, making it a reasonable baseline for newer smartwatches. The Series 3 takes some of the good parts of the Series 1 and 2, like the display and reliability, and improves on them, though it's not a major upgrade. But Apple has also made some significant changes to the interface, and the watch is now more expensive than ever before. We're here to let you know what you're buying. Apple Watch Series 1 vs Apple Watch Series 3: Design The Series 3 Apple Watch looks like an even more refined version of the Series 1. As a result, the changes are barely noticeable, except the new black model that replaces the classic silver Apple Watch Sport. Like previous Apple Watches, the Series 3 has a thinner, lightweight design, making it comfortable to wear for most people. Apple Watch Series 1 vs Apple Watch Series 3: Fitness The Series 1 and Series 3 Apple Watches are almost identical when it comes to fitness features. The Series 3 Apple Watch comes with built-in GPS, which makes it ideal for runners and cyclists. It can track running and cycling workouts, as well as track steps, distance, and calories burned. You can also pair an iPhone or Apple Watch to Apple's Workout app for guided workouts. Apple Watch Series 1 vs Apple Watch Series 3: Screen The Series 3 Apple Watch has a display that's the same size as its predecessor, though it's a bit brighter and more vibrant. It's also slightly easier to read than the Series 1 Apple Watch's display. Apple has improved the "Retina" display on the Series 3 Apple Watch. The pixels are actually smaller than on previous models, and they're a bit sharper and more vivid, with better contrast. Apple Watch Series 1
